WORK EXPERIENCE

Systems Engineer | Full-Stack Development — May 2026 - Present

Divergent Technologies Philippines Inc. - City of Makati

- Developed and maintained FastPOS V3, a Tauri, React, and Rust POS used by 10+ clients, delivering 4 client-specific customizations and API integrations
- Built a warehouse management system for head office, integrated with FastPOS V3 via API to extend the platform to retail
- Diagnosed and fixed production issues (~2 per week), including printing failures, X/Z read performance, and inventory discrepancies
- Used agentic AI tools (OpenCode, Devin) for planning, debugging, testing, and code review, manually reviewing generated code before it ships

PROJECTS

FastPOS V3 | Tauri, React, Rust, SQLite, PWA — 2026

- Contributed core features to a pay-as-you-order POS as part of a 3-person team, including loyalty, membership, and cash control
- Independently built a QR ticketing module for an amusement park client: the POS prints a QR code on each receipt, a validation server flags tickets as valid, expired, or already used, and a gate-scanner app lets staff check them

NEGESHOCA (Capstone Project) | Team Leader — 2023 - 2025

- Led development of a Kotlin Android app with Firebase Realtime Database and an Arduino-powered ESP32 for barcode scanning, dynamic cart management, and automated checkout
- Implemented on-screen QR codes for cashier retrieval and thermal receipt printing to streamline checkout
- Extended the system with real-time inventory tracking and a point-of-sale interface using Java and Firebase

EDUCATION

Bachelor of Science in Information Technology — Sept 2021 - Sept 2025

Cavite State University, City of Imus Cavite

- Cum Laude | Relevant Courses: Data Structures, Web Development, Databases, Software Engineering

SKILLS

Languages	TypeScript, JavaScript, Rust, SQL, Kotlin, Java
Frameworks & Libraries	React, Next.js, Tauri, Tailwind CSS, SeaORM, Drizzle ORM
Databases	PostgreSQL (Supabase), SQLite, Turso, Firebase Realtime Database
Tools & AI	Git, GitHub, OpenCode CLI, Devin CLI, Claude, DeepSeek
